## SERUM INDICES IQC

Randox Serum Indices third party control will help consolidate your testing with 4 separate levels and an unrivalled stability of 14 days when reconstituted at 2°C to 8°C. Designed for the pre-analytical assessment of HIL interferences, your laboratory can report either quantitative or qualitative results helping you gain and maintain confidence in your laboratory testing methods & results.

### PRE-ECLAMPSIA QC

The Acusera true third-party Pre-Eclampsia Control delivers an unbiased, independent performance assessment of placental growth factor (PlGF) and soluble fms-like tyrosine kinase-1 (sFlt-1) assays. Provided in a liquid frozen format for user convenience, this control has an excellent open vial stability of 30 days when stored at 2°C to 8°C, ensuring that laboratory costs and wastage are kept to a minimum. With assayed target values provided and suitable for use on various immunoassay analysers, you can count on us to provide QC results you can trust.

### XANTHOCHROMIA QC

The Acusera Xanthochromia Quality Control is designed to deliver a cost-effective, high-quality solution for use in monitoring the performance of Bilirubin and Oxyhaemoglobin in Cerebrospinal Fluid (CSF) using a spectrophotometer. Aqueous based, with components of human origin, the Xanthochromia Controls are unassayed and are suitable for use on various UV spectrophotometer analysers.

## ACUSERA

Offering complete test menu consolidation, our Acusera range of true third-party controls are manufactured with quality in mind. With the ability to streamline laboratory procedures, our controls help save laboratories time and money. Benefits of Randox Acusera QC include our ability to consolidate multiple controls in to one laboratory friendly solution, accurately assigned target values, lot to lot consistency and excellent stability.

## QNOTICS

The Qnostics range of positive run, whole pathogen, third party controls are designed to monitor the daily performance of a wide range of molecular assays used in the detection of infectious disease. Our extensive portfolio comprises hundreds of characterised viral, fungal and bacterial targets which cover a wide range of diseases. Additionally, our Qnostics controls help in supporting a laboratory's accreditation requirements in line with ISO 15189:2022

## QCMD

QCMD is a world leading External Quality Assessment (EQA) / Proficiency Testing (PT) scheme, dedicated to improving the quality of molecular diagnostic assays used in the detection of infectious diseases. The QCMD portfolio is extensive and stretches across more than 90 EQA programmes whilst covering over 300 target organisms. Furthermore, our extensive database of users boasts over 10,000 participants in more than 100 countries, therefore ensuring QCMD is one of the largest providers of molecular EQA in the field of molecular diagnostics.

OCTOBER 2024

### VIVALYTIC

Randox Laboratories and Bosch Healthcare Solutions are changing the accessibility of molecular diagnostics with the launch of the revolutionary Vivalytic. Using Randox patented Biochip Array Technology, Vivalytic is the easiest-to-use and most-comprehensive multiplex PCR platform on the market. The device also supports low-plex and high-plex testing, simplifying the processes for otherwise complex laboratory test procedures.

## REAGENTS

Randox offer an extensive range of third party diagnostic reagents which are internationally recognised as being of the highest quality, producing accurate and precise results. Our test menu spans over 100 assays, covering over 100 disease markers including specific proteins, lipids, therapeutic drugs, drugs of abuse and more. A wide range of formats and methods are available providing greater flexibility and choice for any laboratory size.

## RX SERIES

Precision, reliability and accuracy are synonymous with the RX series of clinical chemistry analysers. The RX series leads the way with the world's most extensive dedicated clinical chemistry test menu comprising routine chemistries, specific proteins, lipids, therapeutic drugs, diabetes and more. Guaranteeing real cost savings through consolidation of routine and specialised tests onto a single platform.
